EDUCATION

Bachelor of Computer Science

Graduated June 2020

[University of Waterloo](#)

Coursework: Distributed Systems, Databases, Big Data, Operating Systems, User Interfaces, Computer Security, Computer Vision, Artificial Intelligence

SKILLS

General: Python • JavaScript • Bash • SQL • Scheme

Databases/Infra: Elasticsearch • Kubernetes • Terraform • Postgres • Snowflake • BigQuery • MongoDB

Data Engineering: Spark • Prefect • scikit-learn • scikit-image • Pandas • Airflow

Web Development: React • FastAPI • Rails • ASP.NET • GraphQL

EXPERIENCE

Adeptmind [Senior Software Development Engineer](#)

January 2023 – Present

- Architected and led development of a distributed data ingestion and enrichment pipeline (**Python, Prefect, Kubernetes, MongoDB, Elasticsearch**) integrating custom scraping logic and processing 10M+ product records daily across multiple retailers.
- Engineered and owned the core backend platform (**FastAPI, Python, Postgres, OpenAI**) powering the company's AI/LLM initiative. Built scalable pipelines for deduplication and retrieval of 2M+ long-tail SEO keywords and implemented **vector embeddings** to semantically link related product pages, significantly improving content discoverability and driving product growth.
- Pioneered the company's first A/B testing program with **Statsig**, running ~25 experiments per quarter and delivering insights that informed product and marketing decisions for major retail clients.

[Software Development Engineer](#)

June 2020 – Dec 2022

- Owned **Kubernetes** deployments and CI/CD automation (**GitHub Actions, Terraform, Helm**); migrated legacy manual deployments to GitOps workflows and triaged on-call incidents to maintain high availability
- Leveraged **SQL, Snowflake, Google Analytics, and Adobe Analytics** to analyze large datasets and delivered key insights on user behavior that directly informed the roadmap for 5+ new feature developments.
- Recognized with multiple company awards (Best Newcomer, Most Adaptable Engineer, Most Used Internal Tools) for rapid cross-functional impact.

Credit Karma [Software Engineer Intern – Data](#)

Sept 2019 – Dec 2019

- Built a **hybrid recommender system** that leveraged matrix factorization and deep neural networks to improve recommendation click through rates by 6% for users with prior interactions.
- Designed and conducted experiments to determine the most optimal way to handle recommendations for newly introduced (cold-start) items.
- Built and deployed data pipelines on **Google Cloud Dataflow** using Apache **Beam** and **Airflow**.

Hashtag Paid Inc. [Software Developer Intern](#)

Jan 2019 – April 2019

- Designed and built an Amazon **Redshift** data warehouse to consolidate data from multiple sources, resulting in up to 9x faster queries for performance analytics. Used **Airflow** to manage data pipelines.
- Architected feature to support concurrent team users using **Ruby on Rails (w/ RSpec)**, **React** and **PostgreSQL**, leading to significant improvements in client productivity and satisfaction.

Fast Access Blockchain [Blockchain Developer](#)

May 2018 – Aug 2018

- Developed client-side web wallet with an interface for decentralized app (**dApp**) creation, deployment and interaction from the ground-up using **Angular**.

PROJECTS

fbIRL

Worked with a team of 3 to build an augmented reality networking application using **React Native, Expo, Flask** and **FB Graph API**. Won first place at Facebook Dev Hackathon
